About

I am a full stack application developer with 10+ years of experience coding with multiple languages & frameworks. As an experienced software developer, I have a passion for writing clean and extendable code that solves complex problems. I take pride in my ability to build high-quality applications that deliver value to users. My attention to detail and commitment to best practices ensures that my code is easy to read, maintain, and scale.

Experience

Learning Pool / LEAD APPLICATION DEVELOPER

2021 - Present, Remote

- Designed and implemented innovative solutions that enhanced business operations and yielded time and cost savings for the company
- Developed an application to automate our localization process, reducing expenses and time significantly.
- Created applications to train managers on how to deal with difficult situations with employees to reduce liability and maintain positive morale and working relationships internally and externally.
- Demonstrated proficiency in delivering impactful solutions that drive business success.
- Converted a manual process SSO configuration to a database driven application that saves hours of manual work and provided a maintainable, testable and reliable service
- Developed automated processes to reduce manual risk intensive labor as it related to data manipulation and processing
- Optimized ingesting of client data for speed and validity

True Office/ APPLICATION DEVELOPER

2015 - 2021, Arizona

- Engineered a Learning Management System from the ground up, now with fortune 500 clients and with millions of users.
